ADDIS ABABA WORKSHOP FOLLOW-UP

Guide to Deleting Resources in the HydroServer Playground

October 29, 2026

CENTER FOR GEOSPATIAL SOLUTIONS

WMO

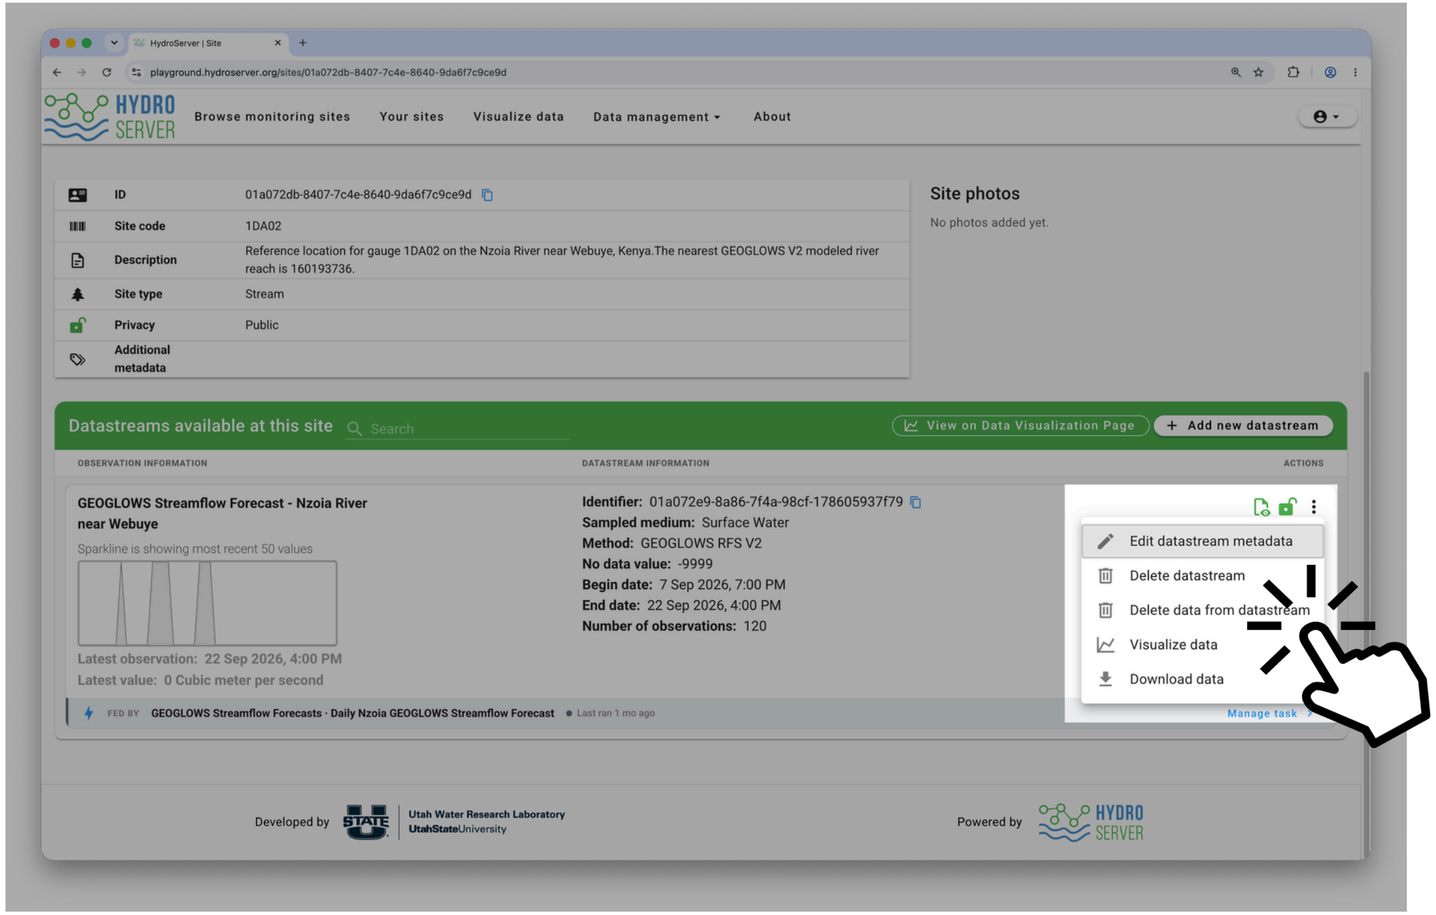

NOAA

This workshop is supported by funding from the United States government.

Deleting a Datastream & Datastream Data

1. Go to playground.hydroserver.org and log in.
2. Select **Your sites** from the top menu bar.
3. In the **Your registered sites** section, click on a site to select it.
4. Scroll down to the **Datastreams available at this site** section.
5. Click the ⋮ **More Actions** icon button.
6. To **delete data from the datastream**, click the 🗑️ **Delete Data from datastream** menu option.
7. To **delete the datastream**, click the 🗑️ **Delete datastream** menu option. This action will also delete all observations associated with the datastream.

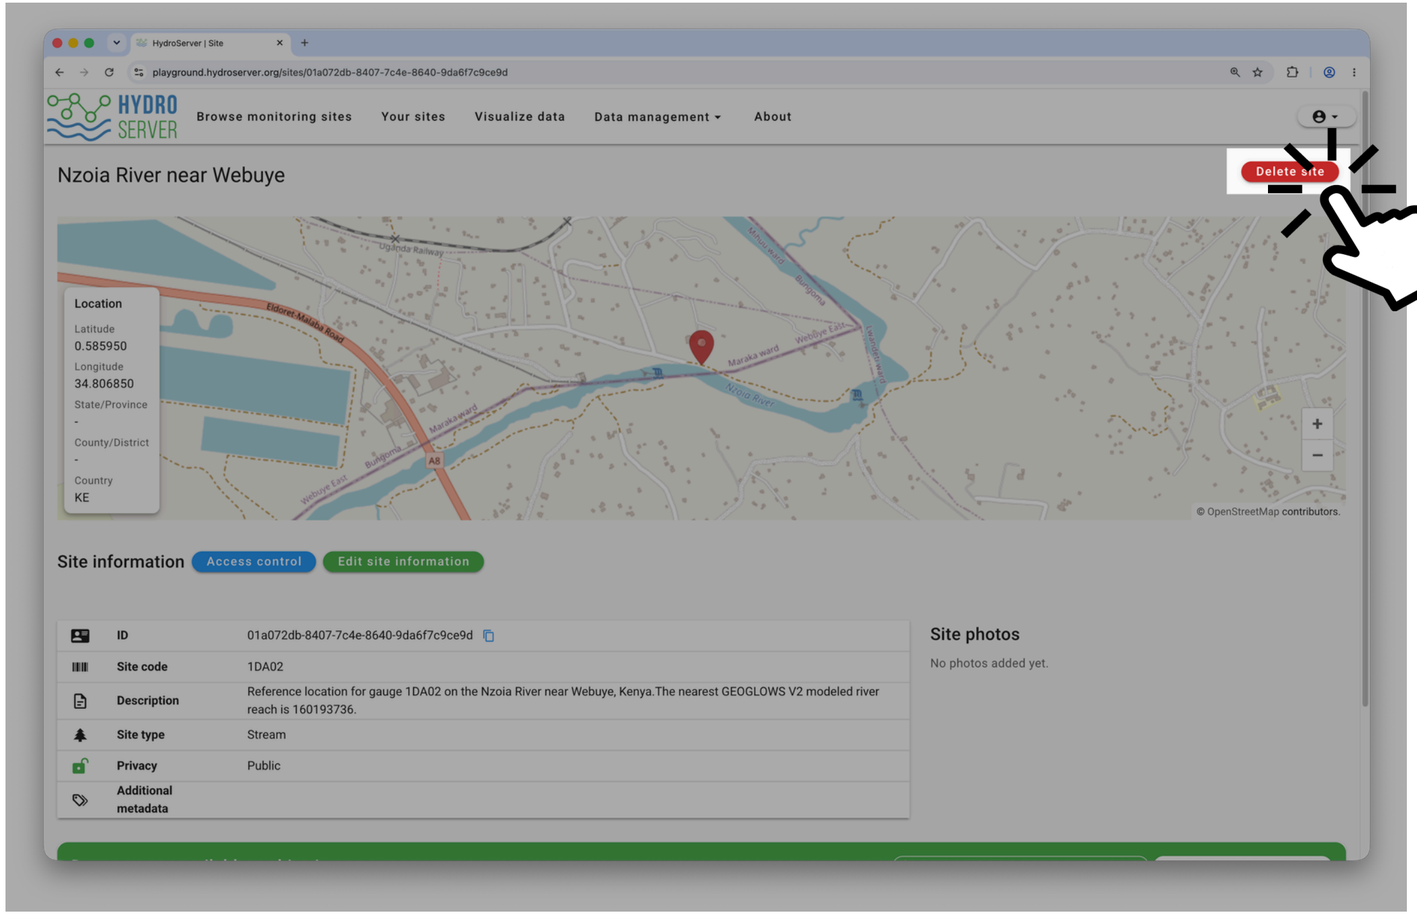

For more information, see HydroServer's Deleting a Datastream documentation.

Deleting a Site

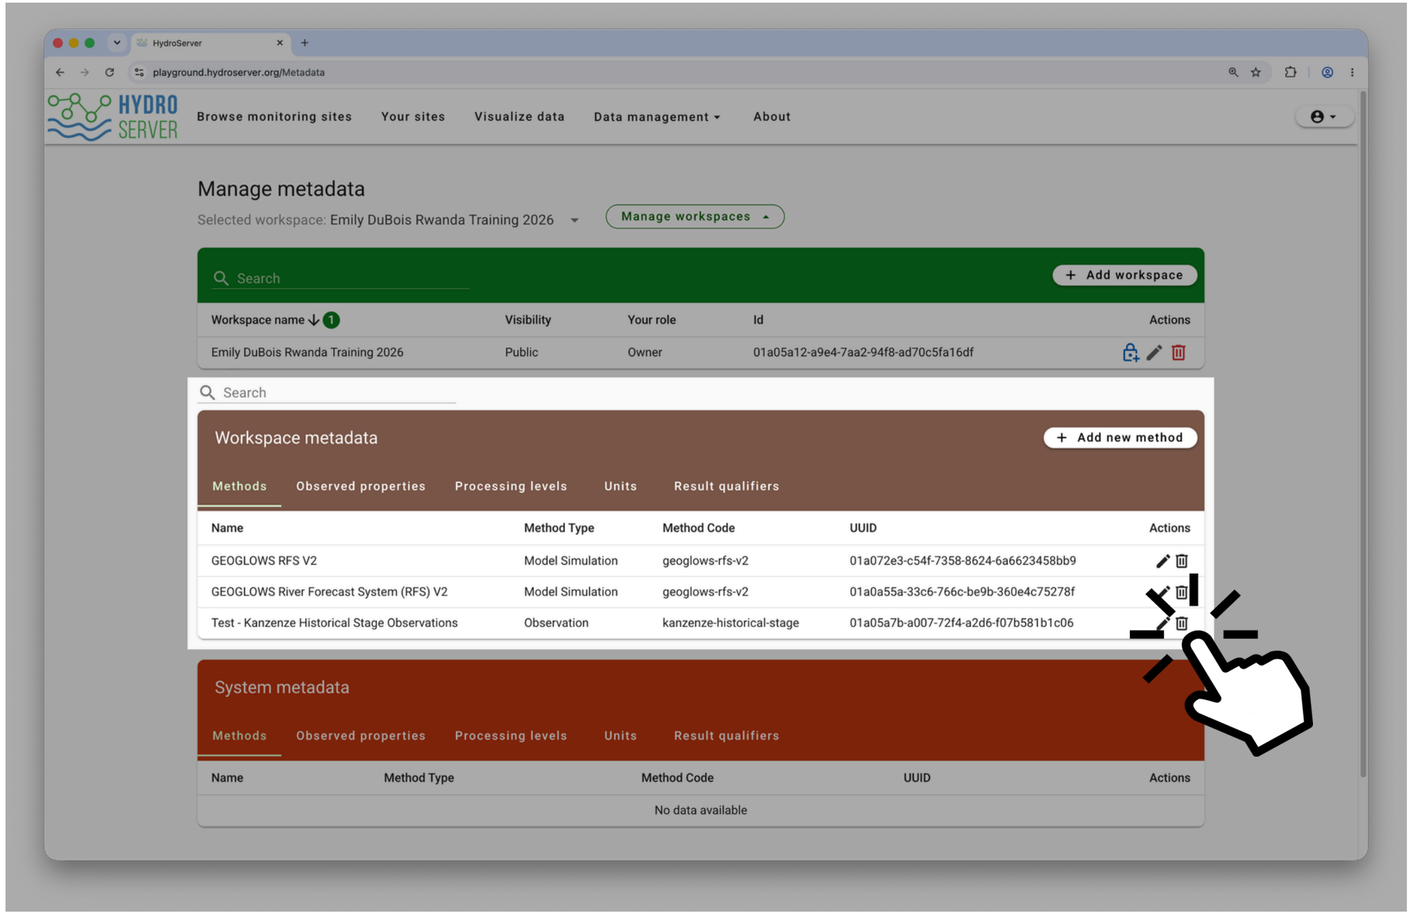

1. Go to playground.hydroserver.org and log in.
2. Select **Your sites** from the top menu bar.
3. In the **Your registered sites** section, click on a site to select it.
4. To **delete the site**, click the **Delete Site** button in the upper-right corner. This action will also delete all datastreams and observations associated with the site.

For more information see HydroServer's Deleting a Site documentation.

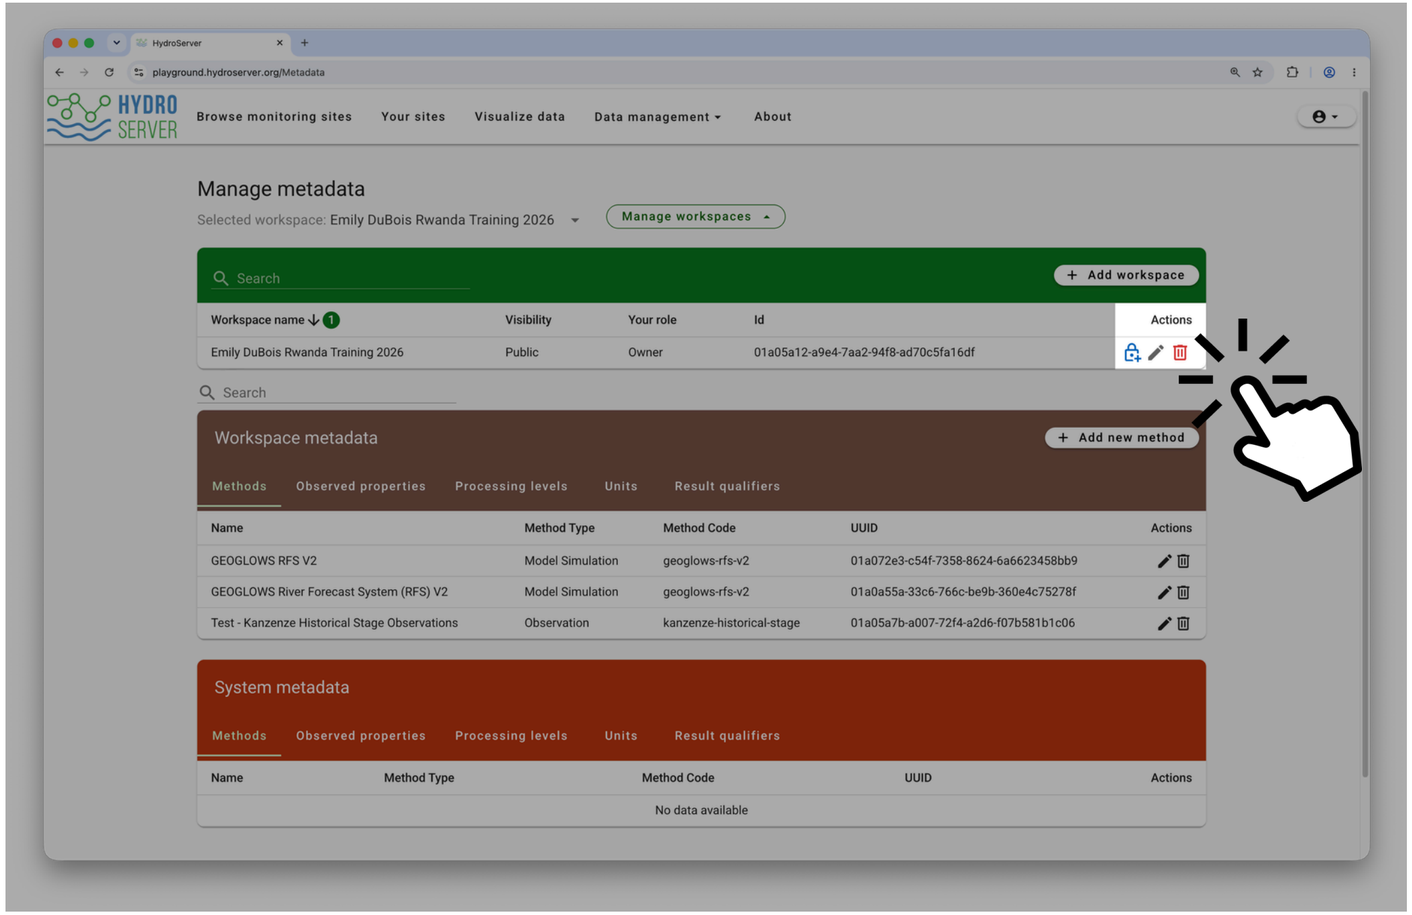

Deleting Workspace Metadata

1. Go to playground.hydroserver.org and log in.
2. Select **Data management** → **Manage metadata**.
3. In the **Workspace metadata** section, you can **delete methods**, **observed properties**, **processing levels**, **units**, and **result qualifiers** by clicking the 🗑️ **Delete** icon button. If a datastream is using the metadata property, you must first delete the datastream or update it to use a different metadata property.

Deleting a Workspace

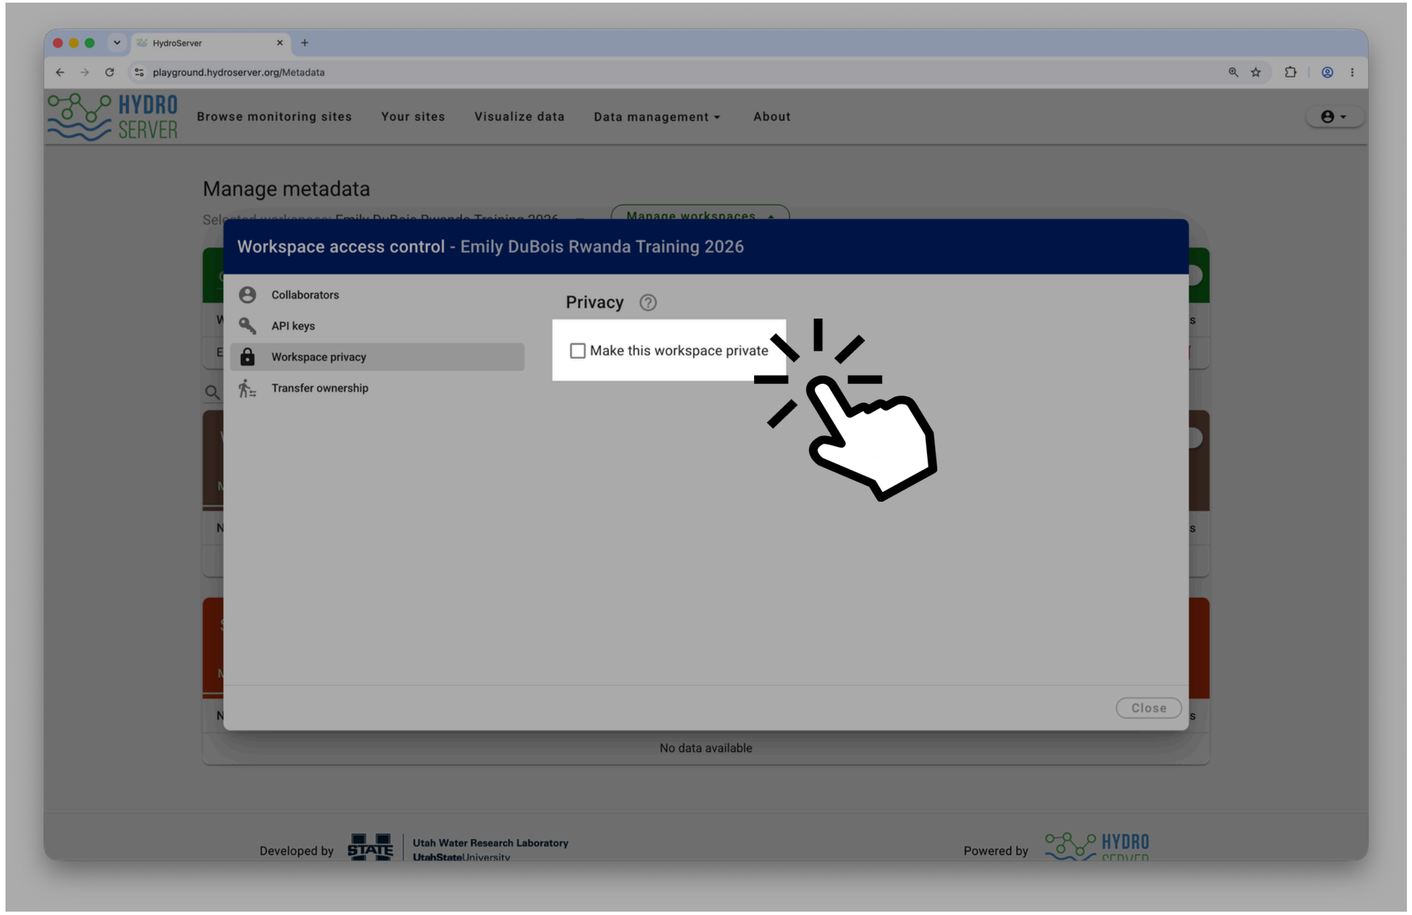

1. Go to playground.hydroserver.org and log in.
2. Select **Data management** → **Manage metadata**.
3. In the first table, you can **delete a workspace** by clicking the 🗑️ **Delete** icon button. If you do not see a table, click the **Manage workspaces** button to expand it. This action will delete all sites, datastreams, metadata, and user permissions associated with the workspace.

Restricting Workspace Access

If you would prefer to scope workspace access instead of deleting it:

1. Go to playground.hydroserver.org and log in.
2. Select **Data management** → **Manage metadata**.
3. In the first table, you can **control workspace access** by clicking the 🔒 **Access Control** icon button. If you do not see a table, click the **Manage workspaces** button to expand it.
4. From here, you can place limits on your data such as **remove collaborators**, **demote user permissions**, **delete API keys**, **make the workspace private**, and **transfer ownership**.

Deleting Your Account

1. Go to playground.hydroserver.org and log in.
2. Select 👤 **[Avatar]** → **Account**.
3. To **delete your account**, click the 🗑️ **Delete Account** button. This action will delete all your sites, datastreams, and observations you have primary ownership of, user information, and preferences.
