

Session 2 – Consultation Debrief

BREAKOUT GROUP WORKSHEET

Use this worksheet to capture the main points from your discussion. You do not need to answer every prompt exhaustively. Focus on what feels most important to your group.

☒ Collect

☒ Transmit

☐ Store

☒ Process / QC

☐ Share

☐ Use / Decide

1. What is happening here today?

- Collect data
- Enter on Clinsoft
- Transmit

2. What is working well or poorly?

- Instrument not working well
- Transition from Clinsoft to Clinsoft web is ongoing / problematic
- Transmission works well - manual statistics
- Sharing within the country and between countries is free

3. What would we most like to improve?

- Entering ^{data} into Clinsoft Web - faster

One key observation

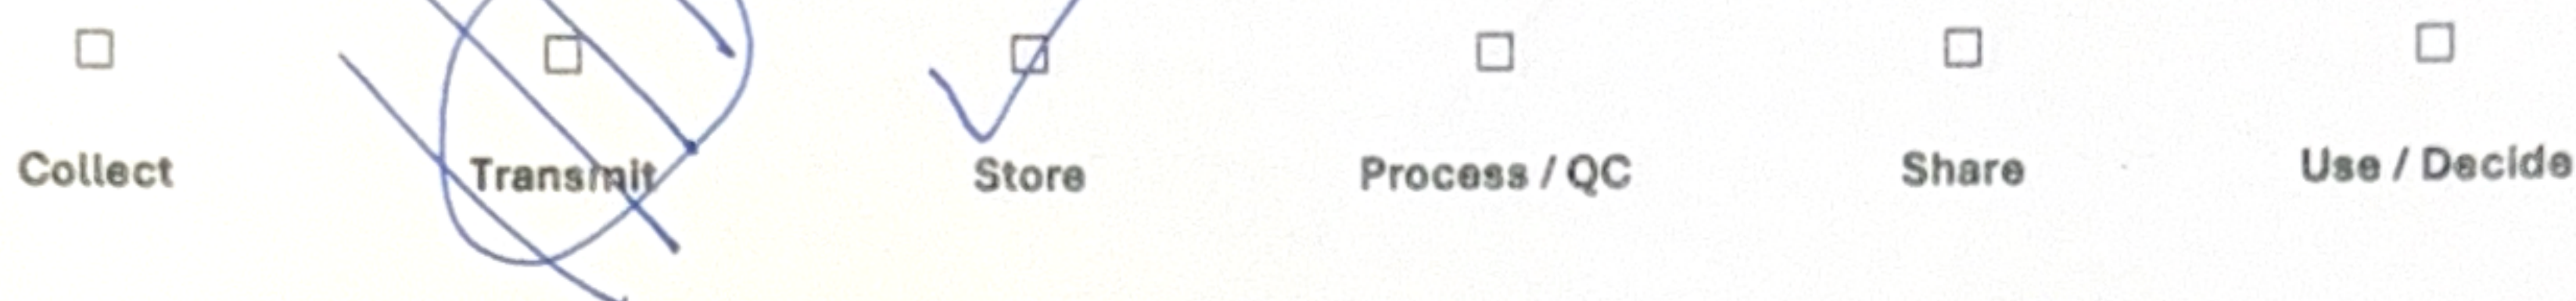

Complete this sentence: The most important thing our group noticed is...

Clinsoft web is still under development.

Session 2 – Consultation Debrief

BREAKOUT GROUP WORKSHEET

Use this worksheet to capture the main points from your discussion. You do not need to answer every prompt exhaustively. Focus on what feels most important to your group.

1. What is happening here today?

- limited storage space for huge data (Composite data)
- legal policies that hinder the data storage
- storage locations and data redundant sites

2. What is working well or poorly?

- CSV are easy to store and are not bulky / Interoperability
- Proprietary data formats from the equipment manufacturers
- Storage media ~~obsolescence~~ obsolescence (eg magnetic tapes)

3. What would we most like to improve?

- Standardise data formats to universally acceptable files
- Upgrade to new technology
- Improve the utilisation of a centralised storage of data

One key observation

Complete this sentence: The most important thing our group noticed is...

Centralised storage is very crucial for research and ultimate decision making

Session 2 – Consultation Debrief

BREAKOUT GROUP WORKSHEET

Use this worksheet to capture the main points from your discussion. You do not need to answer every prompt exhaustively. Focus on what feels most important to your group.

☐
Collect

☐
Transmit

☐
Store

☒
Process / QC

☐
Share

☐
Use / Decide

1. What is happening here today?

- Quality control is manual (mostly)
- QC not standard
- Limited no. of QC experts.

2. What is working well or poorly?

- Collected data available
- Some applications are working ok - i.e. climsoft, R-Instat, QGIS
- Incomplete/missing data
- Erroneous data, etc
- Different data formats
- ~~App~~ Available app not able to handle big volume of data.

3. What would we most like to improve?

- Standardized QC process
- Competent QC personnel
- Data Mgmt & processing softwares

One key observation

Complete this sentence: The most important thing our group noticed is...

Standardize QC & processes

Session 2 – Consultation Debrief

BREAKOUT GROUP WORKSHEET

Use this worksheet to capture the main points from your discussion. You do not need to answer every prompt exhaustively. Focus on what feels most important to your group.

☐	☐	☐	☐	☒	☐
Collect	Transmit	Store	Process / QC	Share	Use / Decide

1. What is happening here today?

Data are shared on request subject to MOWs & data policy. With the exception of hydrological data from Rwanda - which is available publicly.

2. What is working well or poorly?

Well :- * As long as an MOW or Payment is made data is shared freely

* Data policies & governance in place

* Demand for early warnings has triggered co-production

Poorly - Coordination b/w stakeholders - Data ownership is not respected
Disregard of MOWs - Data sovereignty

3. What would we most like to improve?

- Clear frameworks for data sharing.

One key observation

Complete this sentence: The most important thing our group noticed is...

Interoperability (of data sharing (governance & policies) technical) is key in improving data sharing.

Session 2 – Consultation Debrief

BREAKOUT GROUP WORKSHEET

Use this worksheet to capture the main points from your discussion. You do not need to answer every prompt exhaustively. Focus on what feels most important to your group.

☐	☐	☐	☐	☐	☒
Collect	Transmit	Store	Process / QC	Share	Use / Decide

1. What is happening here today?

- looking at data constraint
- Identifying where the gaps are in the value chain.
- Sharing information

2. What is working well or poorly?

- Delay in data transmission
- Missing data
- Inefficient flow of data.
- Data quality limitations

3. What would we most like to improve?

- Extent of Automation of stations
- Capacity of data technicians should be improved
- Even distributions of stations
- Maintenance of AWS.
- Continuous upgrade of technology.

One key observation

Complete this sentence: The most important thing our group noticed is...

There are more problems upstream.
