

Session 2 – Interactive Exercise

Consultation Debrief

Ms. Emily DuBois & Dr. Caroline Staub

CGSearch.org

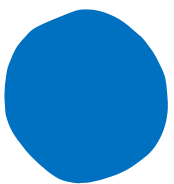

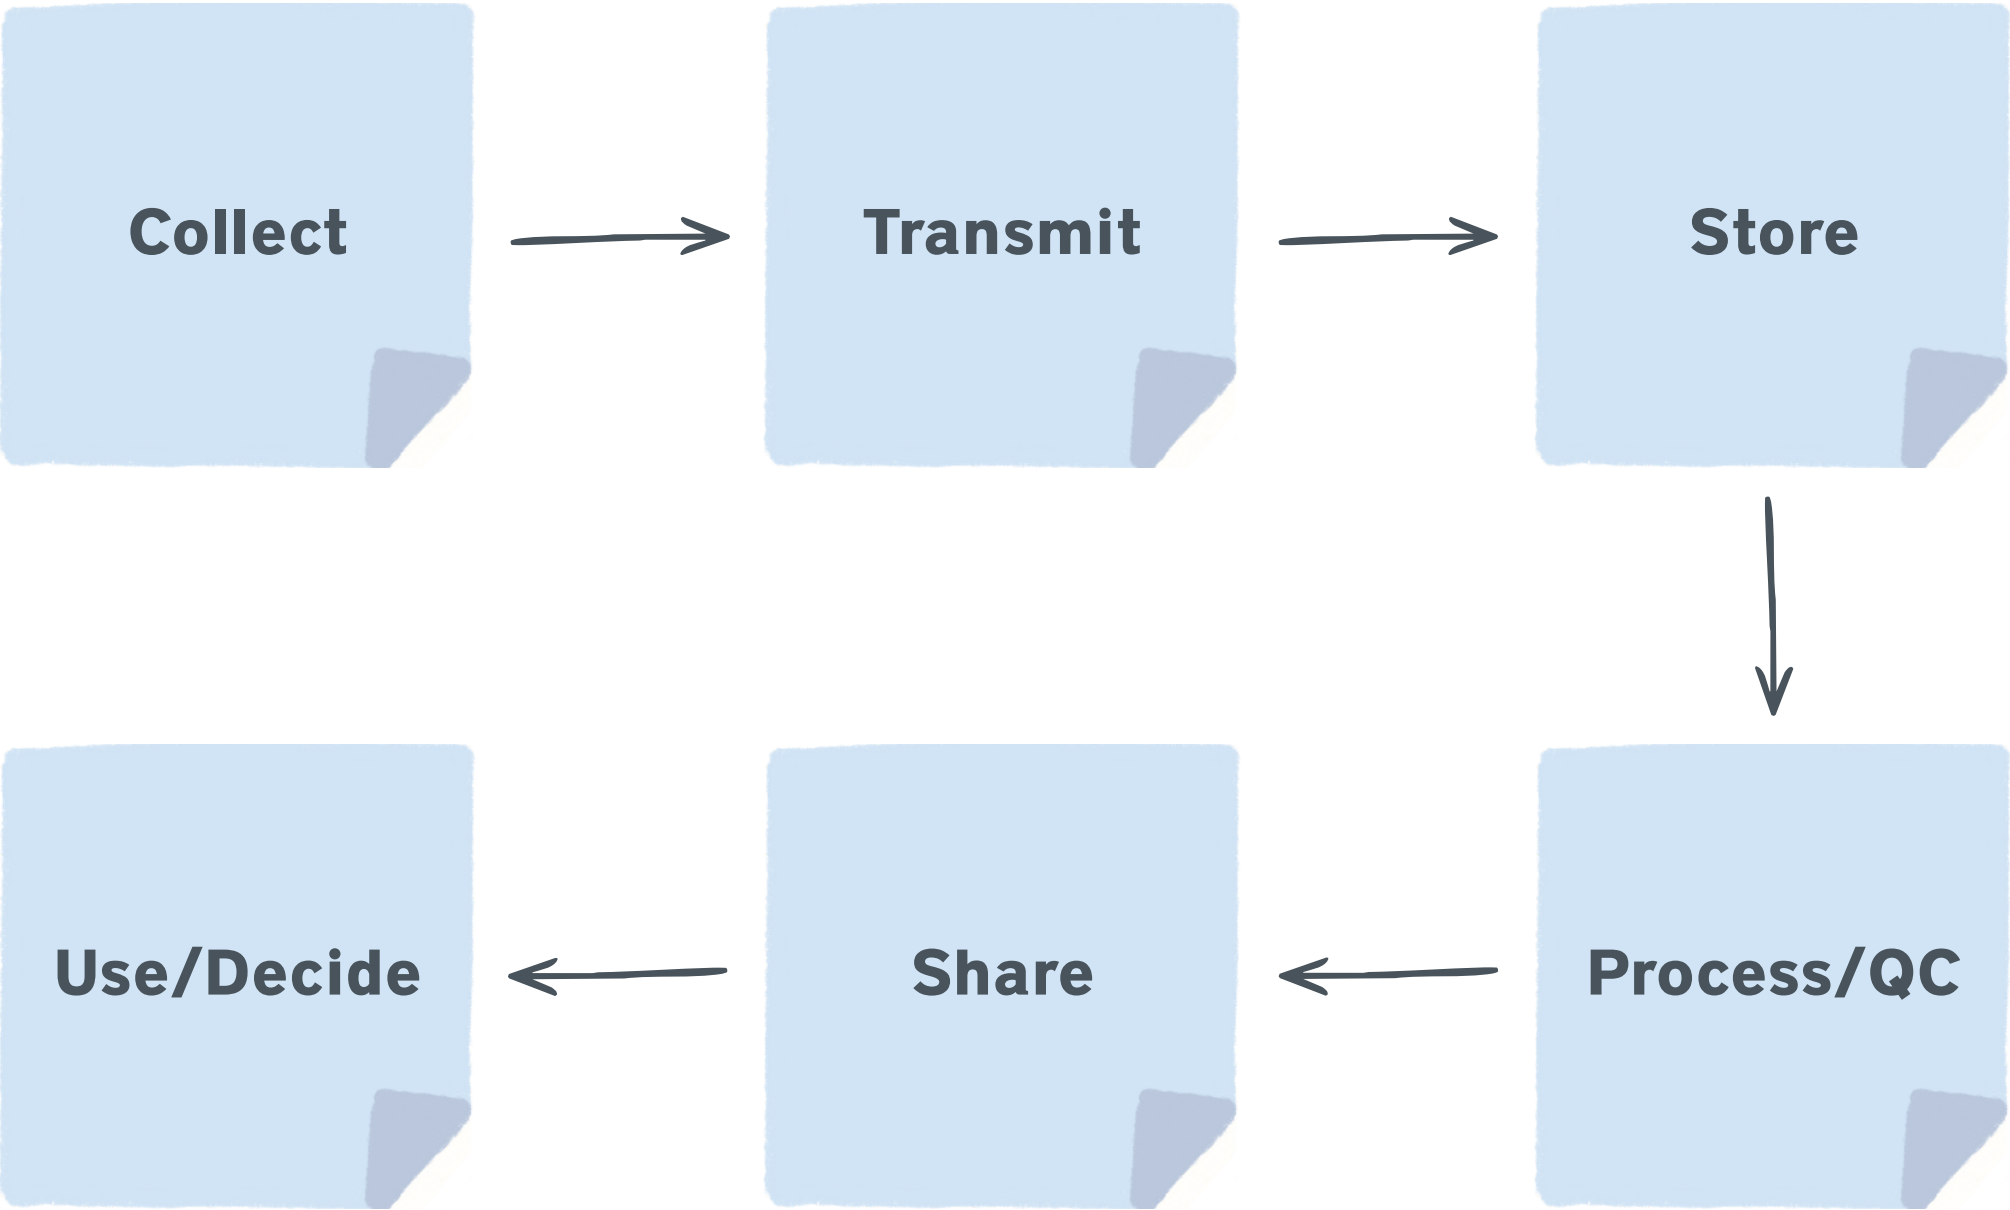

This workshop is supported by funding from the United States government.

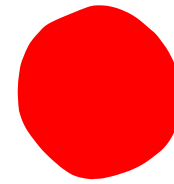

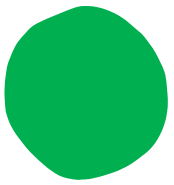

Our Objective

Reflect on the current hydrometeorological system – where people work, where challenges occur, and where improvement can have the greatest benefit.

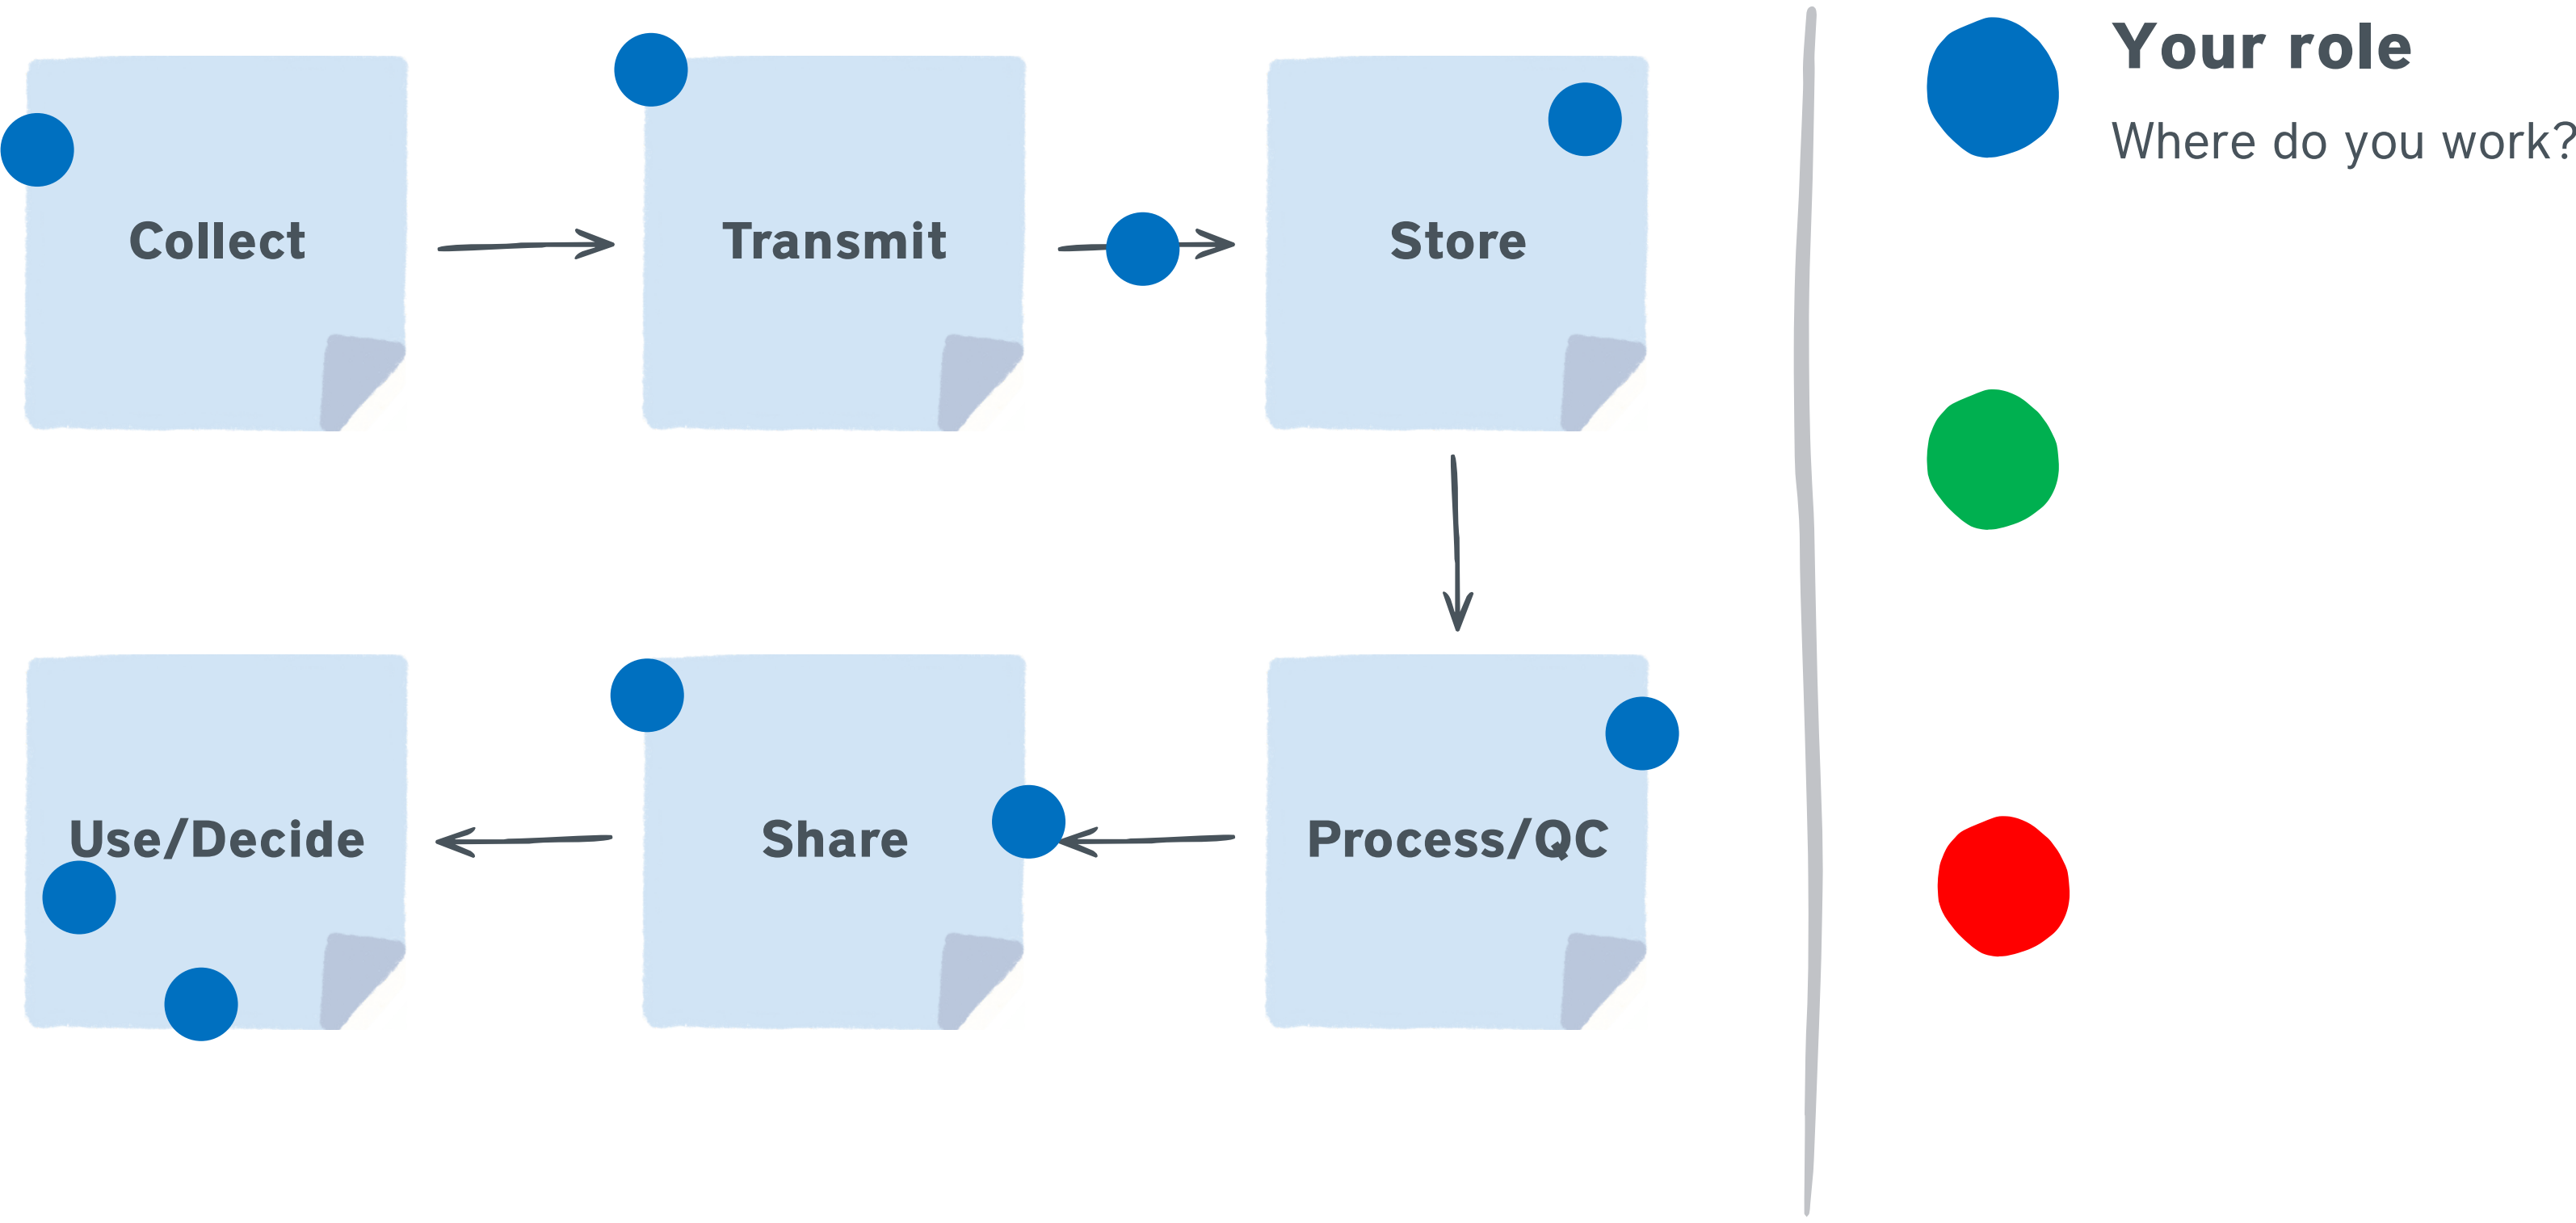

Current Hydrometeorological System

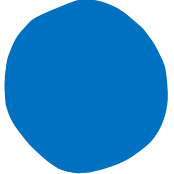

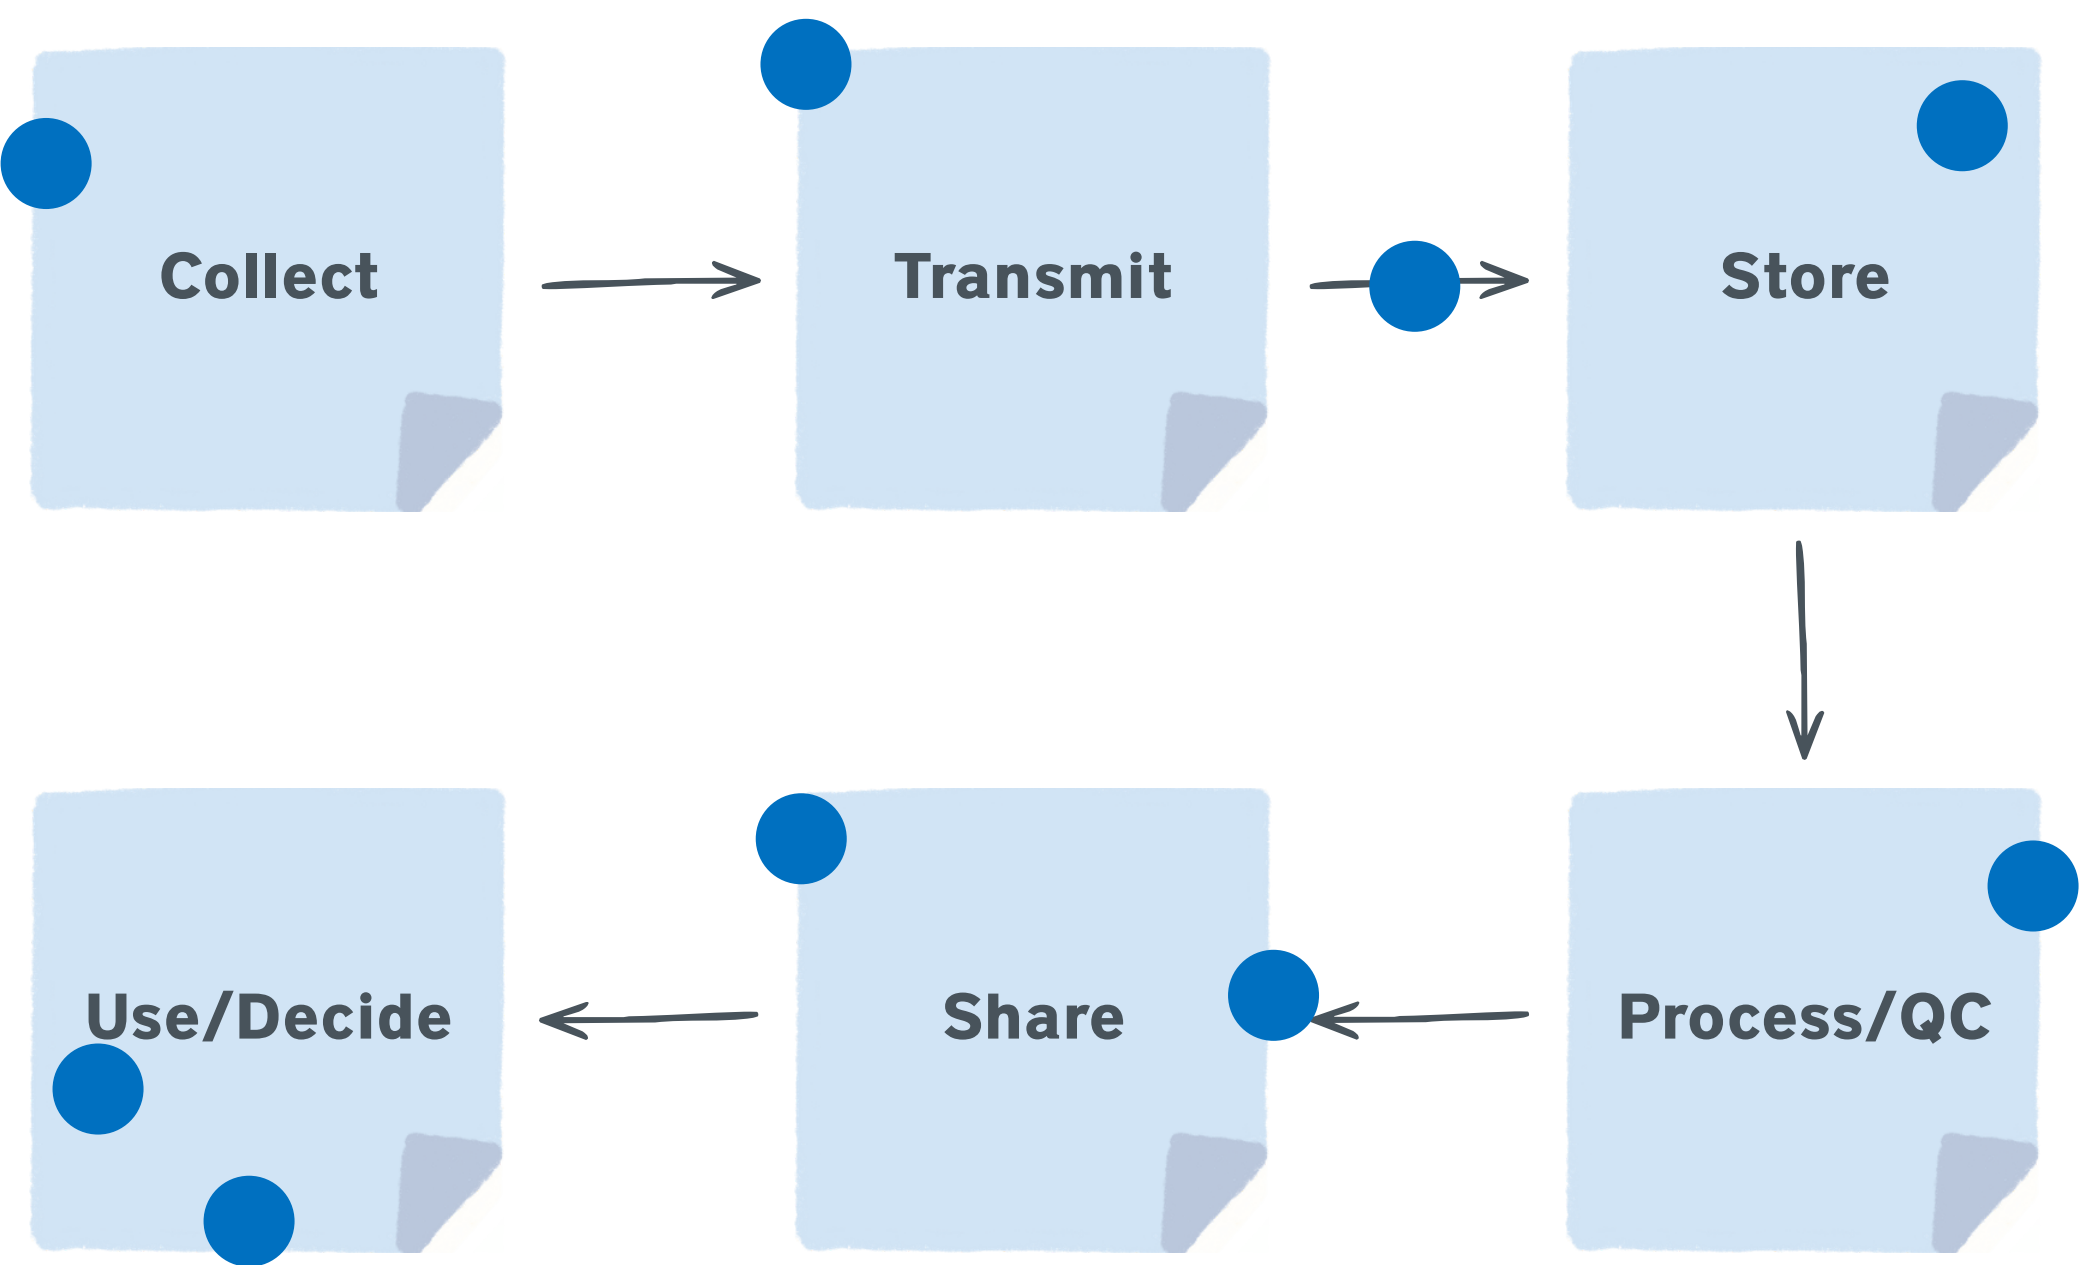

Your role
Where do you work?

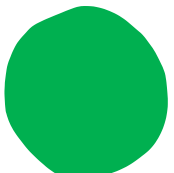

Current Hydrometeorological System

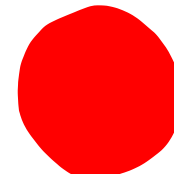

Current Hydrometeorological System

Your role
Where do you work?

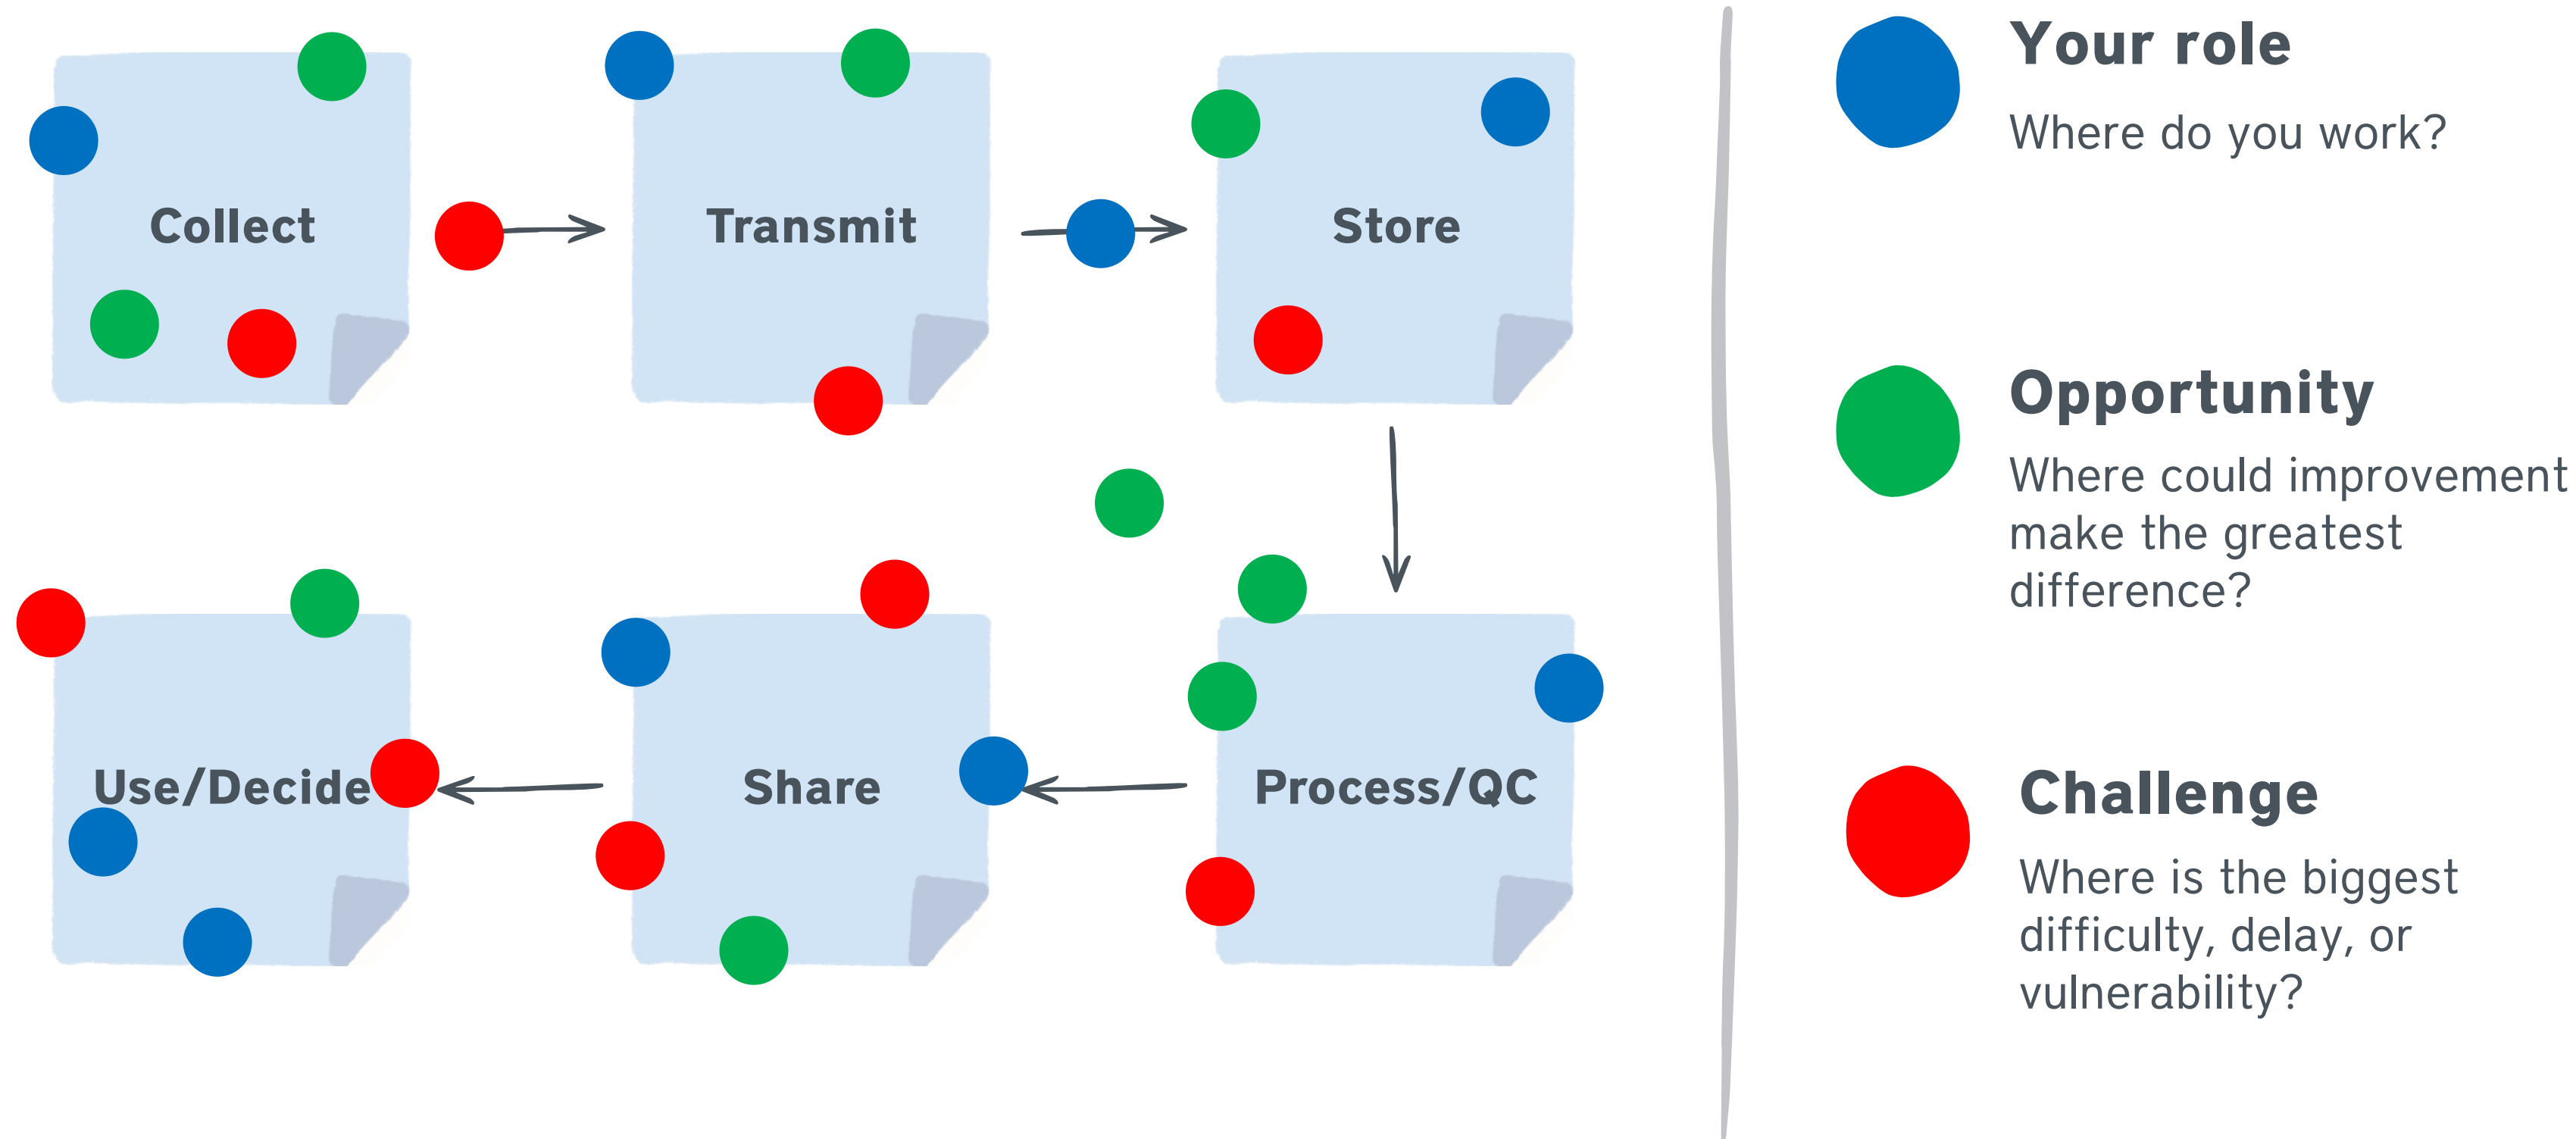

Opportunity
Where could improvement make the greatest difference?

Challenge
Where is the biggest difficulty, delay, or vulnerability?

Current Hydrometeorological System

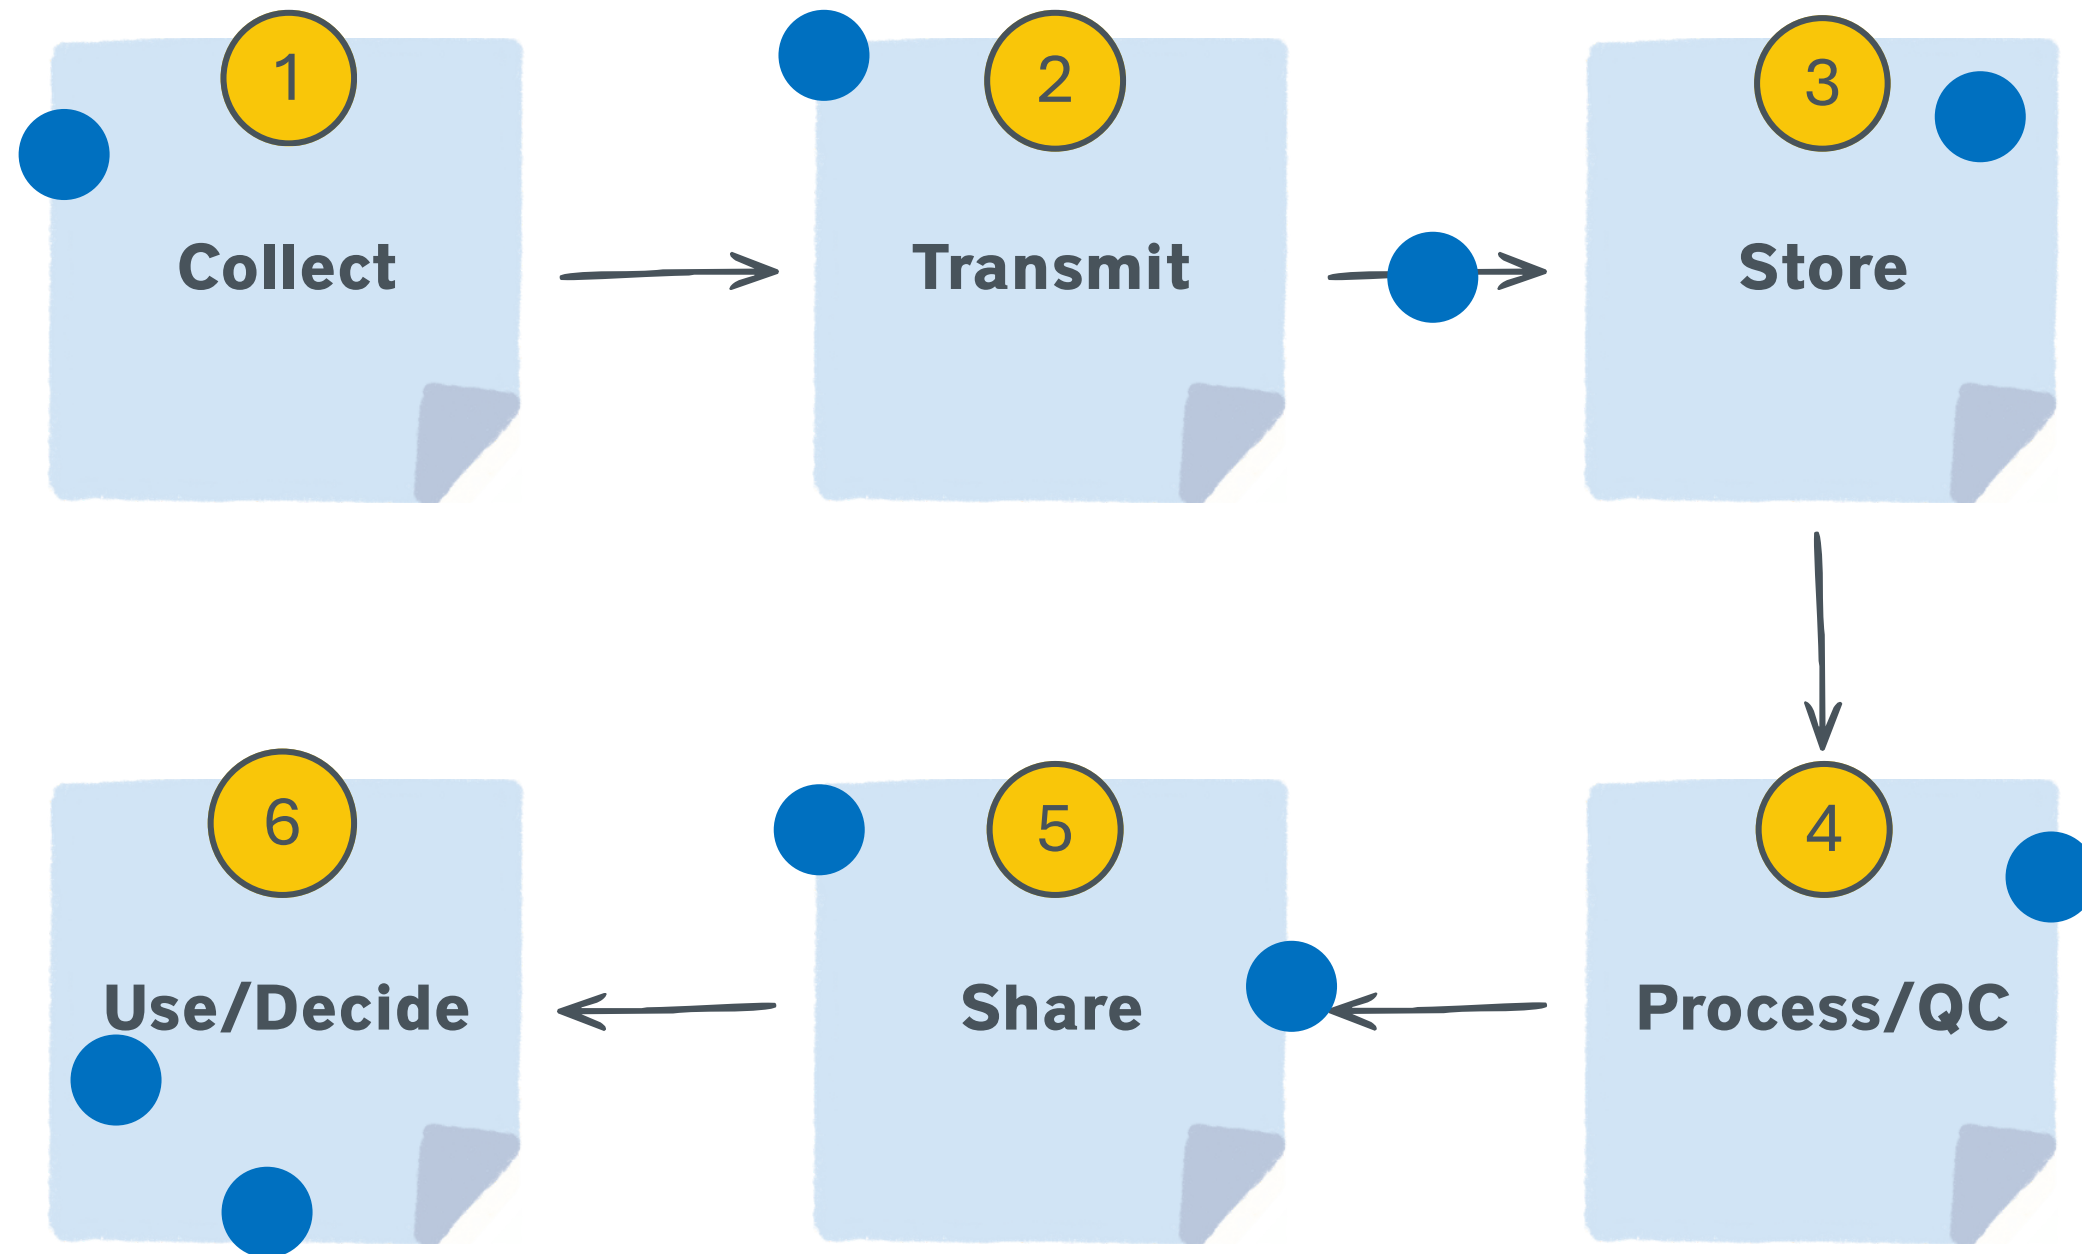

Discussion

- What patterns do we notice?
- Where are challenges clustering?
- Where do we see the most opportunities?
- Are there any surprises?
- Any other observations?

Breakout Groups

What is happening here today?

What is working well or poorly?

What would we most like to improve?

Write down notes and one key observation on your worksheet.

Thank you!
