

REFINED ACTION PLAN MHEWS UNDER EL NINO

**HYDROLOGICAL SERVICES
UGANDA**

What are you piloting, and what is the priority data sets and data workflow?

- Readiness of the HS to deliver early warning information for the community in Manafwa Catchment

Priority datasets

- water level,
- observed flow,
- observed rainfall
- forecasted rainfall

What changed this week?

- **Pilot/testing site has changed**
- **The workflow also changed**
- **Insights – the capabilities of HYDROSERVER**
- **During the week, we learnt that there is an opportunity to seamlessly integrate hydrological and meteorological data through HYDROSERVER**

What happens next week?

- **What are the 2 to 3 most important actions or requirements to move the pilot toward implementation?**
 - **Integration of FACILA and AQUARIUS as well as integration of AQUARIUS with HYDROSERVER**
 - **IT (Deus), Aggrey, Caroline**
 - **Review training materials to facilitate deployment of HYDROSERVER.**

Support Needed

- Integration of HYDROSERVER with AQUARIUS
- Integration with Climweb modelling interface
- Hydrological modelling with WRF
- Operation within HYDROSERVER (when needed)
